Visit: Knight Hexlock privacy app has a unique feature. Other Android app cabinets block apps according to the recommended island, while this app removes visible apps from your smartphone screen. The app not only offers intuitive control, but also free and perfect for hobbyists. It also offers various features like protecting your person list, messages and more. Visit: Privacy Knight Lock Fingers Security This is one of my favorites and one of the best cabinets for Android. Fingers is a lock for Android devices that allows you to use your device's fingerprint sensor to prevent access to apps. I noticed that these fingerprint-based app cabinets didn't support the old gear of my old Galaxy S5. This is a unique feature of this app that works even with the oldest hardware. Very old phone owners, rejoice! Download the app from the Google Play Store and select apps to block. You can also select lock animation for successful and unsuccessful fingerprint identity. I noticed that this app works fine and did not shut down in the background. This was an issue I encountered while testing other apps. There is an open shadow notification in progress. You can disable, but the request will warn you that if you disable this permanent notification, it won't always run in the background. However, even when notifications were closed, I think the app performed fairly consistently. There was no situation where I closed requests to be closed. It is one of the perfect Android phone cabinets and you should give it a try. Visit: FingersCuriryApplock Pedentprint This is another popular app you might have heard in the play store. Applock - Fingerprint protection is not only fingerprint, but also pin combination. An exciting featureWith this program, you can define different passwords for different applications. It's pretty cool, right? What kind of app password you can remember by changing the name (congratulations) or something like that! The smartest thing is that it is possible to define profiles based on various connections, such as B. Reliable Wi-Fi, on the network or when connecting to a reliable Bluetooth device to disable the App Store. I use it to disable the app when the phone is connected to my home Wi-Fi network. Nobody touches my phone throughout the house, so I save a few seconds when I enter the PIN or delete the home button. This is one of the best and most reliable app stores for Android phones. Try it right in the Google Play Store. Visit: Appic FingerprintNorton App Lock This is one of the most amazing Android app locks. It is named after the famous antiviral solution for mobile devices and desktops. The Norton App Store is one of the most reliable Android app cabinets. Choose a pattern, a fingerprint latch or a conventional pin. I really like the fact that it has no ads. There is a feature that was a bit mistaken at first, but now it seems to work well, i.e., self-interest. It takes pictures of anyone entering the wrong password or PIN. Senior popular Android app store. At first, it was very unreliable as it indicated the content of the blocked apps on the latest app screen and had many more errors. But now it is improved with variable animations and access to the background. There are no ads in the cm app, it can block settings such as WLAN and Bluetooth, and actively recommend which apps you should protect. You need to provide access to this app use as it needs to know when WLAN or mobile data are on or off to change the security of these settings. I noticed that the surface of the model has not changed much since the beginning. It is still a smooth blue trail between points that still look good. If it is not broken, I will not. Other inherited features, such as B. invader and send the same photo by email, are also supported. If you wish you can choose topics from the gallery by publishingThe fingerprint reader is always working and you can also enter the backup password or model to unlock the app. Visit: CM App Locker See: TechPhopPeepsafe Photo Vaultcksafe Pic Vault You can download the 8 best android emotion apps, is the best android storage app locker you want to carry on your human smartphone. Pic Storage Pic is an important factor that offers military grade encryption that secures your photos with pattern, PIM or fingerprint. However, not only does it store Pic storage, it also offers a complete messy cloud anywhere you store photos to post a memory. KeepSafe is one of the most popular apps you will carry around on your automatic smartphone. The big application factor is that it offers too many security measures. For example, it can hide any app in the app drawer, prevent the gallery, block someone in a file, etc. To do this, Appleck provides photo and video storage wherever you want to store your photos and videos. The Files stored here field will be hidden in the gallery. Visit: COOSAFE PHOTE CASE also see See 4 Best Fake Social Security Number Generator Tooler, the next best wardrobe Android App on the list.
