Free IP Swap, Browser Extension and Proxy Port Generator. Smartproxy is offering a special Black Friday deal of 33% off regular plans until November 30th. 1.Hidester This site requires no software or apps to be installed and can be accessed from multiple platforms, including mobile devices. The servers of this proxy are located in the United States and Europe, which makes it easy to choose from the various countries available. To access Hidester, go to and in the bar below enter the link to the page you want to open that says "Enter URL". The best thing about this proxy is that it doesn't require you to fill any login forms. Top 10 Resume Builders That Create Beautiful Resumes. There is also Hidester Secure VPN software package to unblock the internet. Hidester Proxy 2. Proxysite.com If you want to access social networking sites, Proxysite is the best proxy for you. It also supports sites like YouTube and Facebook. You no longer have to wait until you are out of the office or in a specific country to browse the site of your choice. Keeps your browsing safe with Secure Socket Layer (SSL) encryption. Whether the target site is secure or not/You are connecting to a secure website. This proxy server also gives you the option to block ads and ensure a smooth operation, which makes it popular with everyone. It also allows you to switch between multiple proxies to access multiple countries at the same time. Proxysite.com - Free Proxy Site 3. Hide.me The Hide.me proxy server provides maximum privacy as it does not keep any records of your online activity. Thanks to this, you can use the service without ads even in the free package. The Chrome Web Store also offers an extension for hide.me. Hide.me - Free Anonymous Proxy Browser Hide.me also offers a private VPN, Wi-Fi security and encryption for truly private web browsing. 4. Kproxy Different subscription plans are available for Kproxy server to suit the user. Some of the offers include unlimited downloads, no ads and access to premium servers. Kproxy also offers extensions for Firefox and Chrome. Kproxy server allows you to hide the main menu, which is not available on any other proxy server. Kproxy has one drawback - it often requires a 30-minute wait or asks you to purchase the Pro version after using the extension for a certain period of time. Although this often causes a break in the browsing flow for users, we still recommend Kproxy because of the other benefits it offers. Kproxy - Free Anonymous Web Proxy 5. Hide My Ass Based on the different needs of users, Hide My Ass Proxy offers both a free and a professional version. The free version is recommended for basic private browsing, while the pro version works across devices as well as games and apps. It also allows access to restricted websites and secure online banking with good connection speed. HideMyAss Free Proxy 6. VPN Book VPN Book has a number of servers in Europe, USA and UK. One of the main attractions is that it is 100% free. It also unblocks websites and is easy to access as it does not require login or login.Requirement. This also applies to circumventing state censorship. VPNBook - Free Proxy Server 7. Whoer.net With servers in 16 countries, Whoer.net is a VPN that gives you plenty of choice. You can even leave it to random server selection if you don't know exactly what you want. It's safe to use on public Wi-Fi networks and even protects your browsing history. 5 Best Facebook Alternatives to Protect Your Privacy in 2019. Recommended for online shopping, banking, and secure password-protected login to websites on a public Wi-Fi network. It also ensures data security and anonymity, removing the fear of surveillance and the risk of data leakage. For extra security, it also has 2 different encryption points before the page reaches you. Whoer.net - Free Web Proxy 8. MegaProxy MegaProxy has several unique features that make it different from other proxy sites. This allows you to stop all ads and also block cookies from websites. What also sets it apart is the ability to disable or enable identification of the operating system and browser user agent. One of the limitations is that you can only view a limited number of pages in a limited amount of time and cannot use it to stream media or access HTTPS sites. Megaproxy Anonymous Proxy 9. Zend2 Zend2 is one of the few servers that allows you to watch YouTube and Facebook without additional fees. When using this server, keep in mind that any changes to enable or disable cookies, encrypted URLs, or scripts must be made at the beginning of a session. Zend2 - Anonymous Online Proxy 10. Croxyproxy One of the advantages of using a croxyproxy server is that you can use it to stream audio and video. Without downloading any additional software, you can anonymously use YouTube and all its features like commenting and liking. It can also be used with any operating system including Android and Chrome OS. Croxyproxy - Web Proxy Service Many proxies available have listed the top 10 for you. No server is right for everyone and know what you need before you decide. The benefits of a proxy server range from being able to hide your identity to accessing region-blocked content. It gives you the freedom and choice to access any website without being identified or tracked. When choosing a proxy server, also pay attention to its operating system, service quality, country of origin and speed. I hope this list helps you browse the web without revealing your identity! Tell us what proxy you used when browsing the selected sites. Feel free to post the names of sites that can be browsed smoothly using these proxies so we can use them! If you think we missed a proxy that you think should be on the list, let us know by filling out the form below! Until then, enjoy browsing! Share on Facebook Share on Twitter Share on LinkedIn Share on Reddit A free web proxy service is a great option for protecting your online identity and browsing the web anonymously without having to invest in a paid tool like a VPN. They allow users to browse the web anonymously without any restrictions. But since most proxy services record your activities and sell your data to advertisers, you should look for the best free proxy services. A web proxy acts as an intermediate gateway between you and the Internet. They route your data traffic through their own servers, change your IP address and protect your online privacy. They also help you bypass firewalls and internet restrictions imposed by governments, ISPs, workplaces and schools. The following article takes a closer look at the best free proxy services and what other features they offer to bypass internet restrictions. Top 12 Free Proxy Services in 2022 Let's take a closer look at the above proxy services to better understand their functionality and benefits. 1. Hide.me Hide.me is known for offering a VPN service, but it also offers a free proxy service to help you stay private online if you don't want to invest in a VPN. The proxy is free and offers three server locations: It is the best free proxy service because the proxies do not store activity logs or your IP address, thus ensuring maximum anonymity on the web. It also keeps you safe online as the servers support WireGuard, SoftEther, IKEv2 and OpenVPN secure tunneling protocols. Hide.me proxy allows you to bypass firewalls and access any website. In the search bar that appears, you need to type and enter the URL of the website. The proxy even allows users to customize their online privacy as they see fit. This means you can encrypt your URLs and pages, disable cookies, remove objects and scripts and leave no traces. The site has more than 25 million users worldwide, and this popularity is due to its cross-platform functionality. You can easily download proxy for Windows, Android and Apple devices. The download process is simple and the same as any other proxy service. It is supported by all BitTorrent clients and even offers a SOCKS5 feature to hide your IP address and speed up your connection when streaming. Moreover, it also offers a browser extension for Chrome and Firefox and further enhances your privacy. Since it has servers in three countries, the ping time is longer than usual and it causes slow connection. Watching streaming content on Netflix and Amazon Prime also becomes a challenge due to the limited server network. 2. HideMyAss HideMyAss is another free proxy service that allows you to hide your online identity and access blocked websites. Although the server network is limited to five countries, these are still notable countries that facilitate access to regional and international sites. Shepresent in: Czech Republic, Germany, Netherlands, UK, UK. This proxy server is a great option if you need to access Facebook or YouTube at work or school. You can even use it to stream American, UK, and German Netflix libraries. However, since the server network is not as extensive as a VPN, this can affect the quality of your streaming. It has an interface similar to Hide.me. To access blocked sites, you need to enter the URL in the search box. This is a reliable free proxy service to encrypt URLs and remove cookies and scripts if you wish. Aside from a free proxy, you can use HMA to check whether your DNS and WebRTC are leaking your IP address or not. Other impressive features that HMA offers are unlimited bandwidth and ad-free browsing. You will not be distracted by pop-up ads which users like the most during all browsing time. You can download it on all major devices and operating systems like Android, iOS, macOS, Windows and more. You can also use a free proxy service with HMA VPN as it encrypts your traffic and provides additional protection online. However, like other proxy services, it lacks SOCKS5 functionality. 3. Hidester Proxy The other best free proxy is Hidester, which is simple and easy to use with a similar interface and features to Hide.me and HMA. To use Hidester proxy, open your browser and log in to the website and you will be automatically connected. It also means you don't need to download any additional app or software to make it work. Hidester is a secure proxy as it instantly encrypts your connection with 128-bit encryption and maintains a higher level of online security. It does not store cookies and removes unwanted scripts, making you more private on the internet. It does not register or share your logs with third parties. Furthermore, it uses impressive SSL technology to protect against malicious scripts and hackers trying to steal your sensitive data. It even secures public WiFi and makes it the best free proxy server today. Hidester proxy allows you to bypass government, ISP and employer restrictions to access any website of your choice. Unlike other proxy services, Hidester's server network is limited to Europe and the US. Because of this, your internet speed can be slow when you access it from other locations, which can affect your browsing experience. 4. Whoer Whoer is another premium VPN provider that offers a free web proxy service. It allows you to bypass internet restrictions and access blocked websites. It changes your IP address and ensures maximum anonymity on the web. The server network is not very wide but it covers big countries like: Netherlands/Moscow/London/Paris St. Petersburg Whoer proxy allows you to maintain more anonymity online as it protects against WebRTC leaks which in turn can reveal your real IP address. The free proxy service is only available as a browser extension in Chrome, Firefox Opera and Yandex browsers. To use Whoer, you need to install a browser and an extension and click the Start button to access blocked websites. Additionally, it uses SSL encryption to hide your data and activity from privacy intruders. However, proxy has some major disadvantages. Unlike other proxy services, Whoer offers limited bandwidth, which can affect speeds. Since the server network is not extensive, it is not possible to choose a proxy server other than the assigned countries. 5. ProxySite Another reliable proxy service that allows you to surf the Internet freely and anonymously is ProxySite. Like other proxy services, it also has a premium VPN with additional benefits and features to ensure strong online protection and security on the internet. With ProxySite, you can easily unblock Facebook and YouTube at your alma mater and workplace and take fun breaks without anyone noticing. It uses SSL to encrypt the connection and helps firewalls efficiently and without problems. The best thing about this free proxy service is the gigabyte network that helps you load websites faster and gives you great browsing speed. In addition, it offers super-fast internet speed when combined with SOCKS5. Another feature of ProxySite is the network of servers. It offers over 20 servers in the UK and US, helping to cover your digital footprint. 6. VPNBook VPNBook is another great option that allows you to unblock any website or service. It is a popular free proxy service that does not block any ports and allows you to play region-locked games. It is the best service to unblock Facebook, Twitter and YouTube anywhere. The proxy service offers multiple servers in four locations including: The speed offered is quite decent and helps you bypass internet restrictions. It is a secure proxy service as it does not track or record your IP address or other connection logs. Plus, it enhances your online security with 256-bit SSL encryption and protects your data from prying eyes. Like HMA, VPNbook is a browser proxy service that requires no additional software download. This is a great service that allows you to access blocked websites while hiding your real identity. But then again, it's not free and would spoil your browsing experience with pop-up ads. 7. MegaProxy MegaProxy is another free proxy service that hides your browser and operating system and increases your online anonymity by additionally masking your IP address. It offers servers in the following countries, namely: Canada France Netherlands Italy Germany USA If you select a country, you will receive a country-specific IP address and you can surf the Internet anonymously. It offers great browsing speed and allows users to unblock Facebook, YouTube and other related websites in no time. Plus, you can even unblock geo-blocked content and sites with MegaProxy. OtherThe function of this proxy service is to filter content and websites and ensure smooth browsing. However, unlike other proxy services, it does not offer browser extensions or other additional features that might prevent users from using it. 8. Anonymous Anonymous is the oldest, free and easy-to-use web proxy that offers an ad-free internet experience. It offers unlimited bandwidth and encrypted connections to maintain a higher level of online security. The interface is pretty outdated; however, the same method of use. It doesn't offer any server location information and also has browser extensions and other notable features like removing scripts and blocking cookies on the homepage. To unblock a specific website, you need to enter the URL of the website. 9. Kproxy If you are looking for the best free proxy service, try Kproxy. It is one of the oldest proxy services, operating since 2005, helping more than 1.5 million people maintain a higher level of online privacy. Since it is a free app, no registration process is required and you can download it on your device and browse ad-free. It offers browser extensions for Chrome, Firefox, and Microsoft Edge. These extensions are safe to use as they encrypt the connection between your browser and the target server, preventing prying eyes from stealing your valuable data. In addition, you can easily switch between servers located in: Kproxy allows you to bypass

online blocks and restrictions and easily access blocked content and websites without anyone knowing. Furthermore, the proxy server offers various other impressive features like IP leak protection by default and even offers WebRTC protocol to facilitate access to blocked websites. You can even upgrade to Kproxy pro and enjoy unlimited downloads without worrying about an overloaded server, and unlimited use of the Kproxy extension. However, you can30-day trial period if you are not satisfied with the service. 10. IPProyal IPProyal is another best proxy service that has more than two million IP addresses. It offers users four different proxy servers: residential, data center, sneaker and static residential proxy. Whether you are looking for a proxy service for personal or business use, IPProyal will meet your needs. With these proxies, all your sensitive data is protected from prying eyes. It is the preferred choice of users due to its extensive global network of servers located in all popular locations such as: Australia, Canada, China, France, Russia, United States, processing data using various authentication methods. It also uses HTTPS partial encryption to create a secure connection between your device and the Internet. A proxy server provides anonymous browsing, adding a layer of security and reducing the risk of privacy breaches and cyber attacks. It's a common myth that proxies slow down your internet speed, but using IPProyal saves bandwidth and gives you a faster internet connection. Using IPProyal proxies reduces server load on corporate networks and improves overall efficiency. The only thing people don't like about IPProyal proxies is that they are not free. However, since the prices are quite low, starting at \$3 per GB, you can invest in them. 11. GeoSurf GeoSurf is another best proxy service that aggregates over 2.5 million private and static IP addresses. It is a reliable proxy service that is untraceable and allows you to surf the web freely without worrying about being blocked. The proxy service has a wide network of servers in almost all countries and more than 1700 cities around the world. Some of the main server locations are:IT offers extremely high speed and helps you bypass all filters and access your desired website from anywhere. The high speed of the proxy is not only due to the extensive server network. However, it also uses a proprietary automatic bandwidth optimization technology that guarantees the fastest connection from any gateway in your premium proxy network. Another important feature of GeoSurf Proxy is VPN for mobile and desktop. In this way, you can enjoy more privacy and anonymity by hiding behind a proxy server while surfing the Internet. GeoSurf is a reliable and easy-to-use proxy server that improves user experience by not showing pop-up ads while surfing the web. However, since it is not free, it fails to impress many users. 12. SmartProxy SmartProxy is also one of the best private proxy and data center proxy services. An IP address is assigned for day-to-day use of devices such as computers, laptops, and smartphones. Therefore, ISPs and network administrators can't know who you are and reduce the chances of blocking. In addition, SmartProxy offers data center proxy servers that offer unlimited connections. The proxy service offers over 40 million IP addresses worldwide. It consists of an extensive network of servers located in 195+ locations including: Canada, India, Germany, Japan, UK, USA. SmartProxy uses a rotating network of proxy servers, making it easy to switch to a new proxy server. A private reverse connection proxy efficiently roams to a new IP address and allows unlimited fixed IP sessions. In addition, data center proxies offer high speeds. Another impressive feature of SmartProxy is their responsive customer support. If you encounter any problem, you can contact the technical staff 24/7 via email or start online chat to solve the problem quickly. What users dislike about SmartProxy is that it is paid. It offers a paid plan, but since it comes with a three-day money-back guarantee, you cancheck the proxy service and its features. Are there risks of free proxy services? The free proxy service is attractive and entices users to surf the Internet anonymously without investing a dime. But using a free proxy is a bigger risk. Here are some of the risks associated with a free proxy service provider. No security: free proxy services do not guarantee absolute security and anonymity on the network. The lack of encryption makes it easy to track your activities. There is also an IP leak that reveals your real identity. Slow speed: Most free proxy services provide a minimal network of servers scattered across two or more countries. This leads to server overload and slow and unreliable connection speeds. Malware: Sometimes it can be difficult to check the security of a free proxy service. Not all of them provide an ad-free environment, and the ads they see may contain malware that can compromise their digital privacy. No HTTPS: A study found that 79% of free proxy services do not use HTTPS encryption, and let other people view your activities. The free version of the proxy sometimes lacks necessary security features and is risky to use. However, if you want to use them for short term use, you can use them. Which is better: VPN or proxy? Proxies and VPNs are privacy enhancing tools that serve the same purpose but work differently. While a proxy server hides your IP address, a VPN also encrypts it on both ends, making it impossible for anyone to spy on your online activities. Using a VPN using a proxy server is the best choice for reliability and security. In addition, there are other areas where VPNs outperform free proxy servers, such as: VPNs offer a large network of servers with faster ping times and establish fast connections. You can unblock websites and stream content from anywhere. A VPN provides better security, customization, and reliability. They have a strict no-magazine policy and don't even show you ads. Here are the top three VPNsNordVPN Free Trial: Top VPN Provider, 5000+ Servers, Full Security Features, Works With Netflix, Torrent, Tor & ISP Throttling · 30 Day Free Trial www.nordvpn.com. Surfshark: Works great with Netflix and torrents, can be used without ISP throttling, and has great privacy features. Over 3,500 servers and 30-day free trial www.surfshark.com CyberGhost: Offers over 7,500 servers worldwide, works with torrents, Netflix, and great privacy features. A free 30-day trial is available at www.cyberghost.com. So, if you are a more privacy-conscious individual and want to remain anonymous for long-term use, we recommend using a legitimate VPN service provider. A web proxy is an easy and cheap way to surf the web freely. It hides your real IP address, bypassing internet restrictions and accessing blocked websites. As several proxy services are considered the best, the above mentioned ones are the best with good browsing speed, servers in major countries and additional perks and features that can make your experience amazing. So consider using the free best proxy services mentioned above. However, since proxy services do not encrypt your traffic, which is their main drawback, you may want to invest in a paid proxy service or VPN provider. It is your decision. Yours
