

I'm not robot!

One of the most surprisingly formidable characters in the Dragon Ball franchise is Android 17 -- a cyborg programmed by the villainous Doctor Gero to kill Goku for dismantling the Red Ribbon Army. Joined by his twin sister Android 18, 17 made short work of the Z Fighters who opposed them, only for both androids to be absorbed by the sinister Cell so that the synthetic warrior could reach his perfect form. While the circumstances behind 18 being rescued from Cell were memorably revealed during the Cell Games Saga, the nature of 17's resurrection is a bit more complicated. Dragon Ball Z's Cell Games saw Cell put on a faux martial arts tournament to challenge the Z Fighters, with the fate of the world hanging in the balance. During the showdown, Cell goaded Gohan into transforming into a Super Saiyan 2, who cruelly beat down Cell until he hit him so hard that Cell regurgitated 18. Significantly weaker without 18, Cell attempted to destroy the world by self-destructing before being teleported away by Goku. The resulting blast seemingly destroyed Cell, along with 17, who was still integrated into his body. This would appear to be the definitive end of Android 17, but the cyborg played prominent roles in Dragon Ball Super and the non-canonical Dragon Ball GT years after the events of the Cell Games. 17 even went as far to appear at the end of DBZ, providing energy to Goku's Super Spirit Bomb used to destroy Majin Buu, revealing that he had been resurrected for some time. However, the details behind 17's resurrection are briefly revealed during the Cell Games themselves. Following the Cell Games, with Gohan successfully obliterating a resurgent Cell with a father-son Kamehameha Wave, the Z Fighters gather the Dragon Balls to undo the damage the synthetic warrior caused. The Dragon Balls were used to resurrect all of Cell's victims, although Goku refrained from returning to life himself, feeling that his presence only invited danger for Earth. 17 was among Cell's victims resurrected by the Dragon Balls, who immediately went into seclusion and eventually started a career as a wildlife ranger, beginning a family of his own while living on a remote island. One glaring absence among Cell's victims resurrected by the Dragon Balls is Android 16, who was destroyed during the Cell Games when he attempted to self-destruct with the villain, only to discover that his inner explosive device had been quietly removed by Bulma. In contrast to Androids 17 and 18, Android 16 is completely mechanical, whereas the twins are fitted with cybernetic enhancements developed by Gero. Not being an organic being, 16 is destroyed for good and would either have to be completely rebuilt or restored by a separate wish from the Dragon Balls to be resurrected. 17 has come a long way from his antagonistic debut, becoming one of the most important Z Fighters in Dragon Ball Super. Having grown exponentially stronger since his appearance in DBZ, 17 now physically stands on par with Goku transformed at Super Saiyan Blue, while still boasting the endless energy that makes him and his sister especially deadly. And with 17 saving the Z Fighters and Universe 7 during Super's climactic Tournament of Power, 17's resurrection after the Cell Games would inadvertently save reality -- even if it was something of a quickly dismissed footnote at the time. Super 13 and 16 shouldn't be too different from each other, but if the Meta-Coolers can take 17 and 18 down they should be able to triple team 16 and easy win.17 and 18 have really good teamwork though. So maybe they'll beat Cooler before he can even do anything.2 years ago Reviews: 0User Lists: 0 16 should be able to take 13, and Meta Cooler's regen is cancelled out by 17 & 18's unlimited stamina.2 years ago Reviews: 0User Lists: 0 Team 2 steamrolls team 1 in a mismatch. Reasoning:Meta Cooler already casually defeated Fused-Piccolo. They also have Regen and some sort of improvement, which essentially translates to Durability increases. Each Meta-Cooler individually would give the duo of 17 and 18 some trouble. Two Meta Coolers defeats them with ease.Super 13 is actually the most controversial character here in terms of power. His movie takes place before the Time chamber, but somehow Piccolo is still fused so to figure this out, we need to use scaling. We know that each of the androids, individually, is around or slightly less than a regular Super Saiyan. Once Android 13 goes super, he is then more powerful than any of the Super Saiyans Individually, and can only be killed once Goku absorbs a Genki-Dama. I'd say, bare minimum he would be 3 times more powerful than his base form, since he absorbed two other Androids, and he also no-showed several of SSJ Goku's attacks (which takes a considerable power difference) This should put him at, if not slightly above or below Android 16 and Imperfect Cell.Essentially, Super 13 can hold off Android 16 for enough time that the Coolers will deal with 17 and 18. At that point, Android 16 cannot possibly hope to overcome all 3 of his opponents.2 years ago Reviews: 0User Lists: 0 Reviews: 0User Lists: 0@takenstew22: Against Meta Cooler, 100%. Dende is the god of Earth in that movie, therefor Kami fused with Piccolo at some point.Well if that's true I probably should've only put 1 Meta-Cooler. But people are saying otherwise so it seems to be okay for now.2 years ago Reviews: 0User Lists: 0#24 Edited By Redshift_Bacon@takenstew22: That's because the movie continuity is shaky at best, which confuses a lot of people. I could write paragraphs explaining all of the way the movies dont make any sense. In the Meta Cooler movie, Vegeta doesn't have Ascended SSJ, yet Piccolo is still fused. Yet still, nobody is surprised that Vegeta is a super saiyan (including Goku)Therefore, the only way for this to work is for Piccolo to be fused and for Goku and Vegeta's normal SSJ forms to have, at some point, exceeded his power, probably through training or something. No other option makes sense.For Dende to be God, Kami cannot be alive. If Kami died, Piccolo would have died too. Therefor, Kami fusing with Piccolo is the only logical option. And Meta Cooler put Piccolo down in a few shots.Meta Cooler >> Kamiccolo = Androids.I guess an argument can be made for Android 16 being superior to Super Android 13 though.2 years ago Reviews: 0User Lists: 0The results speak for themselves 2 years ago Reviews: 0User Lists: 0@redshift_bacon: Yeah the movies contradict alot of stuff in the anime and manga. Piccolo had fused with Kami in the manga only a month before the movie's release, so it couldn't have been taken into account. Dende doesn't even become Kami in the manga until several months after the movie is released.2 years ago Reviews: 2User Lists: 4#31 Edited By deactivated-62bb2043566c2Team 2 in my opinion.
