Free RP Codes We've said it a bunch of times but most of the websites offering things like "LoL Free RP" or "Free RP Codes" are almost always a scam, we hope you don't become a victim of one of the scams. They are usually in the form of a "code generator" which is not what Xpango is. Xpango is different because we actually purchase all our Riot Points codes directly through an authorized seller. We then send you a free Riot Points code to your email address. All you have to do is collect Xpango Points on your Xpango account (see below for more info). Then all you have to do is visit the Xpango store and unlock your reward! Skins There are some people who are happy to pay but the majority of players would rather get LoL free skins. Unfortunately nearly all the websites you'll find that promise free League of Legends skins will almost always be some kind of scam, even Riot make posts on the boards/forums about avoiding these scams as at best you'll have given away your personal data and at worst you'll have your account taken. How is Xpango different? Well first of all we never promise we can send you skins but we can promise we can gift you Riot Points in exchange for our own currency Xpango Points. So, you're probably wondering how to get free skins in LoL. The answer is pretty simple. You need to collect Xpango Points on Xpango - once you have enough points you can swap them for free Riot Points. Once Xpango sends you a your free RP codes all you have to do is add it to your League of Legends account and then you can then spend the RP on any champion or skin you want. The title is developed and published by Riot Games and is free to play. The game's most valuable resource is Riot Points, better known as RP, along with the blue BE essence used in League of Legends. Other coins include points of influence (IP). You can earn BE and IP by playing and winning more games, but you have to spend real money to get RP. Not everyone can afford to spend money on buying RP. Therefore, people often search the Internet for ways to get free RP, and as a result of their searches, many stumble upon online in-game currency generator sites. Here's the whole truth about it! Do Free RP Code Generators Really Work? NO! Free RP code generators usually don't work. These are just fake websites that play pre-recorded animations to trap you. These generators available online are just a scam. 99.99% of them are not legal and cannot generate any RP code for you. Actually, there is no free RP code generator. They only exist to make money with Cost per Action and steal your personal information such as your email address, mobile phone number, etc. The applications or pages you visit that are associated with these generators often contain adware and spyware. Therefore, I recommend that you never fall into their trap and never use any of these generators! 7 Ways to Get Free RP Codes in League of Legends (2022) There are many genuine methods available to get free RP codes without the need for generators.
