

Webinar on “Water Management in Thermal Plants” on November 06, 2020

Topics to be covered:

- Types of water source and cooling water
- Types of cooling towers
- Terms associated with cooling towers
- Problem faced in condenser tubes due to Cooling Water
- Factors responsible for CW problem
- Case studies Of Thermal Power plants.
- Objective of cooling water Treatment
- Control of Scaling, Corrosion and Micro fouling in cooling water system and remedial measures
- Zero Liquid discharge (ZLD) and application in power plant
- New techniques for implementation of ZLD in industries
