Collection is compatible with Visio versions 2003 to 2016. Stencil folder is My Documents(My Shapes) (Path names vary for non-US English versions) These stencils work best for any scale templates from 1:2 to 1:30 but NOT Visio's "Blank Page" which is 1 to 1 (no-scale) Visio's "Blank page" causes much frustration. Use our templates instead, they have the right settings to make Visio much easier. This website uses cookies. By clicking Accept, you consent to the use of cookies. News & Events Customers Contact Us Site Map Skip to content Product Type Network Type Product Type Network Type Insights from CommScope's leading minds on connectivity today and tomorrow CommScope has developed an easy-to-use method to create detailed Visio drawings, using a dynamic drawing template. The CommScope drawing template offers many advantages: All CommScope stencils are preloaded for immediate use Software is built-in to alert the user to any new or missing shapes and stencils An automatic BOM report that is exportable to Excel Drawing scale is pre-set to insure compatibility with shapes from other manufacturers Drawing layer is pre-set to allow visibility of doors or bezels to be toggled on and off Title block data is semi-automatically filled in Shapes may be searched for with a partial Product Code (e.g. 360G2-1U*) Shapes snap into place in an intelligent manner (e.g. panels snap to a discrete rack "U" increment) and many shapes are now re-configurable, making changes quick and easy. For instance, an information outlet is a single shape in a stencil (e.g. MGS-500-XXX) but with a simple right mouse button click, it may be changed to any one of the 13 colors that are offered. Changing the color displayed on the drawing will also change the respective data in the BOM automatically. Get Started Please read through the Getting Started document before proceeding. After downloading the stencils, please review the included instructions to get the most out of your Visio experience. Visio drawings, using a dynamic drawing template.
