ROBLOX also has a plugin called "Google Play", which allows any application made with Google Play's interface to be distributed on ROBLOX. The first release of this plugin was in April 2015, but there have been many updates since then.

As of 2015, ROBLOX does not require end-users to use their own search engine to find games.[18] This is bad as some users search for objects such as skins and items instead of games. This can lead to confusion because they may get a game search that directs them to user's profiles instead.

ROBLOX also has a wide variety of blueprints ranging from minigames to full games. ROBLOX's game engine runs within their own website, which they call the "Roblox Platform". The platform also has its own virtual servers that are separated between each user (known as Virtual Worlds). ROBLOX licenses the servers from Sabre Corporation. This means that the servers benefit ROBLOX and not any individual person or company. A private server is solely controlled by an individual and can only be accessed through the client provided by them.[33][34]

There are several hacks available for the game but you will find whenever you are looking at them that they look like they are complicated. This hack is actually simple and easy to use as well so if you wish to get free robux on roblox, then this is the best way for you.

Although the app is designed for ROBLOX users to chat and connect further outside of the website, it also has additional features similar to those available on ROBLOX: users can play games together through group chat, use images and video to communicate with their friends, and create customized avatars for themselves.
