Edite e customize aplicações como quiser Um mercado alternativo para Android Um app indispensável para manter seus apps atualizados Teste o DPC de qualquer app SHAREit - Connect & Transfer Envie seus arquivos fácil e rápido Ajuste a resolução e a taxa de quadros dos seus jogos Android Jogue jogos para Android com um teclado, mouse ou gamepad Description Change log Review AnTuTu Benchmark 5.7.1 APK has been released and this is the latest version from the developer. This app is very important if you want to know all about your Android. Measure of performance or benchmark software is used to obtain an overview of the performance of a device-including smartphones and tablet-in a variety of ways, ranging from the speed of booting up the graphic capabilities. Most benchmark applications present measurement results in numeric format or score points so that you can compare the performance of a device with other devices. Particularly for smartphones, the most famous benchmark weight is AnTuTu (letter 'A' and 'T' is written in capital letters). This application is a reference many smartphone users, up to a vendor to use for promotional event (see picture below), to determine the 'speed run' a smartphone with the most accurate results. In addition, there are several other players in this field, such as GFX Bench, Quadrant Standard, Nenamark 2, and others. But still, most reliable because test results include all the contents of a smartphone device. With the Click and Go test suite, it will comprehensively test all aspects of a device, including UX, GPU, RAM, CPU, I/O and more. Each item is individually assessed and given a score. These scores can be uploaded to the database, and then used to rank your device among all other Android devices. Features of AnTuTu Benchmark APK 5.7.1 User Experience (UX) - Overall device performance with detailed scores. CPU Tests - Measures the power of the CPU, and gives hard numbers for its actual performance. CPU Single Test- Measures the power of CPU by running CPU single test algorithms. RAM Tests - Investigate the real processing capability of the RAM. GPU Tests - Measure the performance of real graphics processing, 3D effects, games, and video playing. I/O Tests - A direct score that reflects on the actual input/output (I/O) performance your system permits. Screenshots Add sensor model information. Add more screen test items. Add 64-bit test for 64-bit Android. Support translucent navigation and status bars (Android 4.4 and above). Support identified the NVIDIA Denver. Support for Android TV. Fixed 2D test crash on ZenFone devices. Update Russian, Korean, Turkish translate. This is one of the best Android benchmarking apps I've seen so far. Results great and accurate. This release does not have a Play Store Description, so we grabbed one from version 8.2.4: AnTuTu benchmark is the most popular Android smartphone and tablet benchmarking app in the world! ☆ Over 100,000,000 users ☆ Benchmark app used during Google I/O 2014 ☆ No.1 benchmark app, used as an industry standard by leading technology companies and hardware review sites. With the Click and Go test suite, Antutu will comprehensively test all aspects of a device, including UX, GPU, RAM, CPU, I/O and more. Each item is individually assessed and given a score. These scores can be uploaded to the Antutu database, and then used to rank your device among all other Android devices. AnTuTu Benchmark V8 is developed based on Android Q. It introduces a number of significant improvements and enhancements over the existing CPU, GPU, MEM and UX tests. New features in Antutu V8.0: 1. CPU: Upgraded test algorithms, optimized support for ARM's new Tri-Cluster architecture, and adjusted the stress distribution. 2. GPU: Introduces new Vulkan scene "Terracotta Warriors" to test the GPU performance of the mobile phone when running high-stress games natively developed using Vulkan technology. 3. GPU: Upgrades "Coastline" scene from OpenGL ES 3.1 to Vulkan to test the Vulkan gaming performance of GPU under medium-to-high stress. 4. MEM: Fully upgraded Memory test items, to test both hardware Direct I/O and system filesystem performance. 5. UX: Increases the load of all the test scenes. Screen refresh rate is included into the scope of measurement. Get your Antutu benchmark score and ranking! Compare and share with your friends! NOTE: The Antutu benchmark score of your device is mainly defined by your hardware configuration, but can also be influenced by other elements, including system mode, current device temperature, running apps and more. The score may vary slightly each time you test. Follow us on Twitter: twitter.com/antutulabs Find us on Facebook: www.facebook.com/antutulabs For any suggestions or feedback, we hope to get your great ideas via email : support@antutu.com 3.6 M Não é incomum que a versão mais recente de um app cause problemas quando instalada em dispositivos mais antigos. Às vezes versões mais novas dos apps podem não funcionar no seu dispositivo devido a incompatibilidades de sistema. Até que o desenvolvedor do app tenha consertado estes problemas, tente usar a versão mais antiga do app. Se você precisar de uma versão anterior de AnTuTu Benchmark, confira o histórico de versões do app na Uptodown. Ele inclui todas as versões do arquivo disponíveis na Uptodown para aquele app. Baixe versões antigas de AnTuTu Benchmark para Android. Quaisquer versões de AnTuTu Benchmark distribuídas pela Uptodown são completamente livres de vírus e sem custo para baixar. 9.4.3 26 jul 2022 9.4.2 13 jul 2022 9.4.2 12 jul 2022 9.4.1 1 jul 2022 9.4.0 15 jun 2022 9.3.9 27 mai 2022 9.3.8 30 abr 2022 9.3.7 28 abr 2022 9.3.6 11 abr 2022 9.3.5 8 abr 2022 9.3.4 16 mar 2022 9.3.3 14 mar 2022 9.3.2 2 mar 2022 9.3.1 21 fev 2022 9.3.0 14 fev 2022 9.2.9 25 jan 2022 9.2.8 20 jan 2022 9.2.7 18 jan 2022 9.2.6 24 dez 2021 9.2.5 9 dez 2021 Ver mais Contato Nosso contato Estamos contratando ID: com.antutu.ABenchMark Author: AnTuTu Version: 5.7.1 Update on: 2015-05-27 Facebook Browser DO NOT support download. Click to open Chrome Browser. Warranty safe installation, no addition ads or malware How to install APK Location: Approximate location (network-based): • Allows the app to get your approximate location. This location is derived by network location sources such as cell towers and Wi-Fi. These location services must be turned on and available to your device for the app to use them. Apps may use this to determine approximately where you are.. Storage: Modify or delete the contents of your usb storage: • Allows the app to write to the USB storage.. Read the contents of your usb storage: • Allows the app to read the contents of your USB storage.. Camera: Take pictures and videos: • Allows the app to take pictures and videos with the camera. This permission allows the app to use the camera at any time without your confirmation.. Network: View wi-fi connections: • Allows the app to view information about Wi-Fi networking, such as whether Wi-Fi is enabled and name of connected Wi-Fi devices.. Full network access: • Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet, so this permission is not required to send data to the internet.. View network connections: • Allows the app to view information about network connections such as which networks exist and are connected.. Phone calls: Read phone status and identity: • Allows the app to access the phone features of the device. This permission allows the app to determine the phone number and device IDs, whether a call is active, and the remote number connected by a call.. Effects on battery life: Prevent device from sleeping: • Allows the app to prevent the device from going to sleep.. System tools: Close other apps: • Allows the app to end background processes of other apps. This may cause other apps to stop running.. Measure app storage space: • Allows the app to retrieve its code, data, and cache sizes. Delete all app cache data: • Allows the app to free device storage by deleting files in the cache directories of other applications. This may cause other applications to start up more slowly as they need to re-retrieve their data.. Modify system settings: • Allows the app to modify the system's settings data. Malicious apps may corrupt your system's configuration... Category Tools Get it on Requirements: Android 4.0+ Version 5.7.1 for Android 4.0+ Update on 2015-05-27 File size 37.400.172 bytes Permissions view permissions What's new - Add sensor model information. - Add more screen test items. - Add 64-bit test for 64-bit Android. - Support translucent navigation and status bars (Android 4.4 and above). - Support identified the NVIDIA Denver. - Support for Android TV. - Fixed 2D test crash on ZenFone devices. - Update Russian, Korean, Turkish translate. 1.
