In January 2016, the Roblox developers said they will be working with an external security firm to enforce a set of rules, and would only support third-party software that is approved by their partners.

I just wish we could have stuff like spoons on roblox and we could make furniture like tables and chairs or a cabinet and some chairs for our avatar. Also I want to be able to make my own game make it like Roblox survival! Please please please update roblox so that we can have stuff like spoons and a table and chairs for our avatar thank you. When there is an update that takes away all the content from one of the games I played, it's sad because I enjoyed it... And other people enjoyed it too.

Roblox is involved in a lawsuit concerning child safety on the Internet. On September 17, 2010, two brothers filed a lawsuit in the United States District Court, Southern District of California against Roblox Corporation and its founder and CEO David Baszucki. The suit alleged that the defendants failed to protect their nine- and thirteen-year-old sons from inappropriate content on Roblox that resulted in emotional distress. The suit also accuses the company of negligence for failure to monitor potentially harmful content and failure to institute parental monitoring measures. The case is known as "McDonald v. Roblox".

Throughout 2008, ROBLOX released a handful of new products including: "Virus Assault", "Prophet", and "Super Bomb Survival". "Prophet", released in August 2008 was essentially a demo for "Super Bomb Survival" which was released in November of the same year. ROBLOX started to develop more games in 2009, including: "Boom Boom Speedway", "Pirate Invasion", and a brand new version of "Dance Off". On February 6, 2009, ROBLOX launched a new game named 'Gladiators'. This game was one of the first games where being shot by another player would cause damage towards your avatar. It also included characters that could attack back.
