More and more British are unlocking their phones. This was discovered in a USWITCH survey that discovered that we spend 48 million pounds a year to unlock our phones. Not only that, an unlocked phone allows you to take advantage of cheap offers only for SIM on multiple networks. It also makes you easy to give your old phone to a family member or friend. Although cell phones have been an important part of our life for over 20 years, the process to unlock them is still a source of confusion. And this is where we enter the game. On this page you will find some useful suggestions to unlock the phone. We will also guide you through the rules of the main networks of the United Kingdom so that you know exactly what you need to do to unlock your phone. We will also dispel some of the persistent myths relating to this topic. For example, is it illegal? Do I have to pay to unlock my phone? And if so, how much? Are there risks? What about your warranty? Read on and we will tell you everything you need to know ... unlock the phone? In search of a cheap SIM purchase only? Here is our selection of the best SIM offers only. What does SIM mean when the phone is blocked? When your phone is blocked, it means that it will only work with the provider from which you purchased it. If the phone is blocked, it will not automatically unlock at the expiry of the contract with the operator. You will have to expressly ask your operator to unlock it. We will explain step by step how it works. Has your phone unlocked? How to find out? Check if the phone is blocked is very simple. Just insert a SIM card from another operator (you can get it for free from a telephony shop or order it online) and see if the network name appears on your phone. You can also ask a friend or a family member to borrow yours to see if you are safe with it and return it in order. If the network presents itself and you can use the phone, it means that it is unlocked. My phone is blocked. And now? Is the release legal? If you want to unlock the phone, you have several options. One way is to bring it to your local independent telephony shop, which usually costs about £ 15 for the service. It could be worth checking in advance its online reputation, for maximum tranquility. Another way is to do it yourself by obtaining a code or using a data cable and special software. However, you need one honestTechnical knowledge for that. Unlocking your phone using one of these methods is not illegal. However, in both cases there is a risk of voiding the original network warranty. However, the safest and smartest way to unlock mobile phones is to call your network and request a release. Whether you're charged and how quickly and easily it's unlocked depends on your mobile operator's policy. Later we will explore all the main network policies. SIM only unlocks the phone using the network. How does it work? When you connect to your network to unlock your phone, it will ask for your IMEI number. This is a unique identifier for the phone and allows the network to determine the brand and model as well as the serial number. Numbers can be obtained in different ways. But this is probably the easiest way to open the phone app and then enter *# 06# using the keypad. The IMEI number will immediately appear on the screen, so you can erase it using a piece of paper. Or using phone apps. Or, if you have an iPhone, you can find it in the Settings app. First, open Settings, then click on General and then For. You will find it at the bottom of the screen. Do you have an Android phone? You can also get your IMEI from your phone settings. Once the settings are open, open the "About device" section and then "status". And there you will find. Once the network has your IMEI, it can start the unlocking process. How long it takes and whether or not the rate applies will largely depend on your network's policy. However, whether you pay monthly or self-pay, as well as the brand and model, also play a role. We'll cover all the major network strategies on the phones' release page below. Why should I unlock my phone? Uswitch's search shows that the most common motivation for unlocking a phone is simply the benefits of SIM deals. Once your phone is unlocked, you're not limited to the rates offered by the network you purchased the phone from. You can choose from the entire market. Last but not least, the truly beneficial offers are SIM-only and available for a limited time only. A SIM-only deal gives you the freedom you need to smash, swap and get the best deals while they're still available. Many people unlock their phone when they want to sell it. Phones are usually unlockedHigher prices and sales faster than prices that are always on the network. If you are a regular traveler and want to save money on roaming fees with foreign network SIM cards, you need an unlocked phone. Compare just a

SIM card here: just SIM, can I unlock your phone for free? How long does it take to unlock your phone?
